

Press release december 2015

London/Chemnitz, 7th December 2015: The company digitronic[®] computersysteme gmbh based in Chemnitz has been honored for its software solution HiCrypt™ 2.0 in London at the SVC Award in the competition category "IT Security Product of the Year" as runner-up

By Saskia Kaeppler

Last week, on Friday night this year's awards ceremony of the SVC Awards was held in London, a yearly presented award for outstanding solutions in the areas of virtualization, cloud and archiving by Angel Business Communications Ltd. More than 200 product applications were received in 25 different categories, including the candidacy of the Chemnitz based company digitronic[®] with the product HiCrypt™ 2.0. Since July 2015, candidates were named for the different categories. Already after this round digitronic[®] was pleased to find itself on the "nominated short list". The kickoff for voting started on 5th November 2015 with the public voting, which was closed on 13th November 2015. 7 well-known technology companies from the USA and Spain fought also for the coveted prize "Cloud Security Product of the Year".

Last Thursday evening then the exciting moment: HiCrypt™ was honored as runner-up, as 2. winner in the category "Cloud Security Product of the Year".

"A 2. place is also a success", said Peter Liebing, Sales Manager and Product Manager, shortly after the announcement. "We are proud that we won against international and tough competition. This encourages us in our everyday work and our mission to make the digital world even safer."

Since 2012, digitronic[®] offers with the software HiCrypt™ an encryption solution for everyone - a digital safe with sole key possession warranty. This allows individuals, companies and public authorities to store their data in the network and in the cloud securely and confidentially. HiCrypt™ combines in a unique process the classic server and personal computer world with the modern, often cloud-based mobile world, but also provides protection of confidential data in data centers. In this way, applicable data protection laws in Germany and Europe are taken into account and protect responsible persons against the breach of current law.
