

Press Release January 2016

Chemnitz, 21.01.2016: digitronic computersysteme gmbh of Chemnitz will exhibit at the RSA Conference in San Francisco for the first time.

By Peter Liebing

The RSA Conference is an exclusive forum for the IT-security industry in the USA and beyond. It is one of the most important showcases for IT-security as well as related products, services and technologies.

As a participant in the joint booth initiated by the German National Association for IT-security, TeleTrust, the "German Pavilion", digitronic® will present its encryption software HiCrypt™ 2.0 with 2-factor authentication in Hall D, Booth Number: 4020/15. This software was awarded Runner-Up in the category "Cloud Security Product of the year" Angel Business Communications Ltd. in December 2015 at the presentation of the SVC Awards. HiCrypt™ 2.0 combines the classical server and personal computer world with the modern, cloud-based mobile world in a unique process, while also offering protection for confidential data in computing centres.

Additionally, digitronic® will present its established software classic "Secure Logon", which protects Windows office work stations and machine controllers in industry by means of 2-factor authentication tokens. The Smartcards used either via contact or RFID and/or in the USB-form meet the highest requirements for certification.

The Security Solutions Showcase will take place in the framework of the TeleTrust/GABA/Symnatec VIP Panel (<http://bit.ly/1Stxm7e>). There, current German innovations in the field of IT-Security will be presented; speakers will include Matthias Kirchhoff, Managing Director of digitronic computersysteme gmbh, who will give a talk on the topic: "Secure usage of mobile devices securely in a production environment. MyCapp™ an utopia."

You can register today for a free EXPO Pass at <http://www.rsaconference.com/events/us16/register> using the following Expo Pass Code: **XSTELTRST16**.

About digitronic®

digitronic computersysteme gmbh is a German Manufacturer founded in 1990 in Chemnitz and develops software and systems for communication and IT-security for agencies of the German federal government, major business clients and medium-sized businesses. digitronic® is the regional office in German National Association for IT-Security e.V.
